PROJECTS

Project name - Etopias

Project Description : Worked as front-end developer in a team of 3 and highly engaged in the system development with determining the business requirements. Etopias is a Business to business (B2B) type, where businesses sell their goods and /or services directly to other businesses. In this system, the companies can easily upload their products, view the reviews on the products or services, improve their marketing and acquire higher margins.

Link : https://etopias.com/
